WINTERTRENDS 2025/26

C35 Pick Up, CBG, DB
17" – 18", Axle load up to 2.300 kg

Heavy duty on the road -
5/6-hole wheels with axle load of up to 2,700 kg.

Whether on a camping holiday, on assembly or on an off-road adventure: more and more people are opting for real workhorses - large vans, transporters or campers with a total weight of over four tonnes. They stand for freedom, lifestyle and comfort.

At CMS, we know that: If you're travelling heavy, you need wheels that not only deliver what they promise - but also look good.

C31 Heavy Duty, CBG, DB
16" – 18", Axle load up to 2.700 kg

New:
VW Bus/
Ford Transit
6-hole

Coloured and front-polished wheels for **winter use**

All designs in all colour variants are suitable for **winter use**. High-quality raw materials, precise processing and a special high-end coating make it possible.

CMS guarantees top performance even in salt and snow and provides a 5-year guarantee against manufacturer's defects for polished wheels in **winter use**.

For the use of snow chains, we only recommend fully painted wheels. Thanks to their 3-layer coating, they are less sensitive and offer resistance to scratches and stone chips.

You can find more information at cms-wheels.com

C38-DB (19" – 20")

Your **CMS configurator** - experience wheels, understand technology

With our online configurator, you can see at a glance how each CMS wheel design will look on your vehicle - realistically, directly on the screen. All common vehicle types can be selected. Need more information? No problem: all ABE and TÜV certificates are available for direct download. Our technical guide also offers a wealth of additional information - including a practical reverse search from the wheel to the right vehicle.

New for dealers: **Complete wheels!**

Complete wheel/tyre combinations including TPMS can soon be ordered via the online shop. Simply select the wheels and tyre brand, combine them and you will have them delivered directly.
