

Pre-Programmed Vehicles Zylux International GmbH

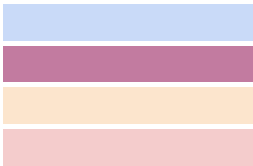

Europe 18.08.2025

This list outlines the compatibility of the Z-Sensor 2.0 with various vehicle makes, models, and years. It includes all the vehicles for which the Z-Sensor 2.0 comes pre-programmed, meaning no additional programming is required after installation. However, for other applications, the Z-Sensor 2.0 may still require programming, which can be done using an ATEQ TPMS programming and diagnostic tool. Therefore, it's essential to consult the coverage list provided by your programming tool for accurate information.

The column labeled "Unique Mnemonic Identifier" indicates the total number of vehicles in the European market equipped with direct/indirect TPMS systems, along with the specific OE sensor referenced in the "OEM Sensor P/N" column.

Ensure that the ATEQ tool is updated regularly to stay informed about any fixes or new vehicle additions.

New Vehicles Added
Indirect TPMS Vehicles
