

Couverture pour véhicule 2025 Zylux International GmbH

Europe 19.10.2025

Cette liste présente la compatibilité du Z-Sensor 2.0 avec différentes marques, modèles et années de véhicules. Il est important de noter que le Z-Sensor 2.0 doit être programmé avant son installation, ce qui peut être fait à l'aide d'un outil de programmation et de diagnostic ATEQ TPMS. Il est donc essentiel de consulter la liste de couverture fournie par votre outil de programmation pour obtenir des informations précises.

La colonne intitulée « Identifiant mnémonique unique » indique le nombre total de véhicules sur le marché européen équipés de systèmes TPMS directs/indirects, ainsi que le capteur d'origine spécifique référencé dans la colonne « Référence du capteur d'origine ».

Veillez à ce que l'outil ATEQ soit régulièrement mis à jour afin de rester informé des corrections ou des ajouts de nouveaux véhicules.

- Nouveaux véhicules ajoutés
- Véhicules TPMS indirects
- Informations modifiées
- Informations supprimées
